Proposal: Proposed sand and gravel quarry with progressive restoration using site derived and

imported inert material to agricultural parkland, public access and nature enhancement

Location: Land at Lea Castle Farm, Wolverley Road, Broadwaters, Kidderminster, Worcestershire

On 10 January 2020 NRS Aggregates Ltd applied to Worcestershire County Council for planning permission for the above proposal. You will recall I consulted you on the above application for planning permission in February 2020 and subsequently in November 2020.

On 30 April 2021, 16 July and 19 July 2021 NRS Aggregates Ltd wrote to Worcestershire County Council submitting additional further information in relation to the Environmental Statement regarding a number of matters including: landscape and visual impact (restoration, phasing and aftercare), ecology and biodiversity, arboriculture, water environment, rights of way and leisure and recreation. The County Council are now seeking comments on this additional further information.

The applicant is seeking planning permission to extract approximately 3 million tonnes of sand and gravel over a total of 6 phases. The land would be progressively restored using site derived and imported inert material to agricultural parkland, public access and nature enhancement. The applicant estimates the development would take approximately 11 years to complete.

When searching by application reference, please ensure that the full application reference number, including the suffix are entered into the search field.

I would be grateful to receive any comments that you may wish to make on the additional further information / application by **9 September 2021** by email or by post to the address below.
