

Responses to questions asked as part of the consultation about the impact of moving Redditch Library from its current location to Redditch Town Hall.

Respondents were asked to tick all the reasons from a list as to why they use Redditch Library. They were then given the same list of library uses and services and asked which ones were a priority for them.

By far the most common use of the library for 73% of respondents was to borrow books. This was also the top priority service offered by the library chosen by 79% of respondents.

The top 5 most common services for both use of the library and priority for respondents was completed by:

- To find out information
- To read/relax
- To research/work/study
- To use free public computers and internet.

As part of the consultation survey respondents were asked “Are there any additional community services you would like to see in Redditch library?”.

550 responses were received for this question.

The most common additional service that respondents would like to see were various types of clubs or meetings at the library, for example book clubs, social clubs and children’s groups.

*It would be lovely to see a wider range of clubs. I know there are already clubs in place, but I think adding a wider variety for a different range of abilities, age and peoples interests would attract much more people.*

Additional services also popular with respondents were an information and advice centre such as the Citizens Advice Bureau, a café and space or clubs for youths.

19% of respondents said that they would be interested in volunteering at Redditch library.

There were slightly more female respondents than male respondents.

30% of respondents said that they have a long-standing health condition or disability. Responses are

### Long-standing health condition or disability
