

Good Afternoon,

Please accept this email as written confirmation I wish to maintain my objection to the proposed quarry. I would appreciate if the inspector reads my last objection which will be noted in the case file.

Since my initial objection my partner has given birth to our first child and unfortunately recently we had to spend a day in hospital yesterday as she is unwell with suspected chest infection which can cause difficulty with breathing.

Soon after we got home, the quarry was mentioned in conversation with a neighbour, immediately this made me think about the needless health issues which the local community, including young children may be subject to if the quarry goes ahead.

We live in Cookley and ask you please don't let this quarry go ahead.

Kind regards
Peter Cook
