

Dear Sir

I'm writing to register my objection to the proposed development of the site at the junction of the A10 and the A1010, which is currently used for the storage of excavated sand and gravel.

The proposed development is a significant increase in the amount of excavated sand and gravel stored on the site, which is a major concern for the local community and the environment.

I am concerned that the proposed development will have a significant impact on the local community and the environment, and I would like to see the proposal amended to address these concerns.
