

Dear Sir, I am writing to object to the proposed quarry at Lea Castle farm,

I have a heart condition/spondylolisthesis and asthma, i use the park where the quarry site is proposed every 2 days ,i have to use a mobility scooter due to my back condition ,i cannot walk very far but have found it is much easier to walk for a while there, as

I have uncontrolled asthma and have further breathing problems due to a heart attack

I love this village and have never left to live anywhere else in my 62 yrs, i have a sense of dread and fore boding that i may never get to see/use my park again due to my poor health, i have a real fear that i may die before the 10yrs are up and i am not stating this lightly ,i have other conditions that i do not wish to go into that add to my fears and the stress and worry of what

dispute that and all the pictures and plans are shown from 5/8/10yrs time do not make an matter what the NRS are going to do to put it right, what matters is we are going to lose
