

I am formally objecting to the proposed lea castle Quarry for numerous reasons. Including but not limited to the following

1. Pollution. This is young to be devastating not only to the air quality but also to people's health. Especially children at the schools nearby. And also people with respiratory illness. The cost to the NHS from potential health issues is completely unnecessary.

2. Devastation to the environment. We have beautiful countryside with wildlife, plants, trees, insects... the list goes on. This quarry will not only completely change the biodiversity in the area, but completely take away the space and beauty that so many people use for better mental health and wellbeing. Leading to further health and medical issues, as per point 1.
