

We have recently moved to Cookley and have been made aware of the Lea Castle Quarry Inquiry currently taking place.

Please consider this email an additional x2 objections on behalf of myself and my husband, Robert Cunningham.

We moved here because of the beautiful green space and amazing community of the village.

The prospect of the quarry is deeply concerning, having listened to the appeal details. We are particularly concerned for our young children, our son is 5 and we have just welcomed our daughter into the world. We are against the quarry mainly due to the environmental concerns such as air and water pollution which could affect our family's health.

Should you require any further details from us, please let me know.

Thank you,

Rachael Cunningham
