

Dear Worcestershire County Council Planning Team,

I am writing to express my strong objection to the proposed quarry development at the Lea Castle site by NRS. This project poses serious risks to our community, environment, and local infrastructure, particularly given its proximity to a school and new residential estates.

1. Environmental Impact:

serious concerns about air quality, with dust and particulate matter potentially impacting the health of schoolchildren, residents, and particularly vulnerable groups like the elderly and those with respiratory conditions. Prolonged exposure to these pollutants can lead to serious health issues, especially for young children.

3. Noise Pollution and Disturbance:

The constant noise from quarry machinery, along with heavy truck movements, will create an intrusive environment for nearby schools, families, and residents.

This

both residents and emergency service access.

In summary, I urge you to consider the substantial concerns we have on our community, particularly on nearby schools. The proposed development does not align with the health, safety, and well-being of the area.

Thank you for considering these serious concerns.

Yours sincerely,
