

Heathfield Knoll School

T 1007

Giovanna

Here at Heathfield Knoll we have a friendly and welcoming area that solves that helps the environment a great deal. We are home to lots of animals and share our beautiful site with corgis, foxes, mountain deer and the rare tawny owl.

We are deeply proud of our green site.

In 2023 we were awarded the ISA, excellence in the environment award.

We have raised the meadow next to our school to help protect the environment even more.

We have an Earth Center which is a polytunnel and growing space.

This year we have grown lots of cucumbers and tomatoes and about 50 pumpkins ready for carving later in the year.

Now about the quarry, it will be very noisy and disturb the animals, it will pollute our environment and create a mess for the school. My fellow students and I are against this happening.
