Further to my previous 2 recent emails, I also wish to query the base line noise sample which was taken in August 2024I understand that this was for a couple of days?

I am just thinking that this would probably have been a fairly quiet time with summer holidays/no school runs and so the sample taken at the time would have been 'light' on  $e X \hat{I}^- \grave{e} \grave{U} 2: \hat{O} \grave{U} e: \hat{U} æ \hat{O} \grave{U} \hat{I} e \hat{O} X T 2 e \grave{U} O es X 4 e \hat{U} v 2 o 2 e \grave{U} U \hat{I} X e \hat{U} u W j \hat{I} X X ... \grave{U} \hat{I} 2 \hat{I} \grave{U} e X \hat{I}^- \grave{e} \acute{Y} \grave{A} \grave{U} \bullet: j + \hat{I} \grave{U} æ \hat{O} \grave{U} \hat{I}^- \hat{O} X \hat{O} 2 e \grave{A} \hat{I}^- \hat{I} \hat{U} e \hat{I}^- \hat{I}^- \hat{I} \hat{U} e \hat{I}^- \hat{$ 

Best wishes, Marcie Smith
