

Dear Worcestershire County Council Planning Team,

I am writing to express my strong objection to the proposed quarry development at the Lea Castle site by NRS. This project poses serious risks to our community, environment, and local infrastructure, particularly given its proximity to a school and new residential estates.

1. Environmental Impact:

“ The quarry will destroy the local flora and fauna but also reduce the natural beauty and tranquillity of our environment.

especially for young children.

3. Noise Pollution and Disturbance

The constant noise from quarry operations will create an intrusive environment for nearby residents, which is unsuitable for an area with new residential developments.

The quarry will also increase traffic on the local roads, posing a significant risk to road safety. The additional trucks and heavy machinery will cause significant wear and tear on the roads, leading to increased maintenance costs and potential road closures for access.

5. Long-term Economic Impact

The quarry could negatively impact the local economy by driving away investors and residents from the area.
